

Race Summary: RUS vs LEC

Methods summary

lap filtering rules: missing lap_time removed; explicit filter_reason_list retained
pit-lap removal rule: pit entry and pit exit laps excluded from trend/delta analysis
SC/VSC exclusion toggle state: False
polynomial fit method and selected degree: numpy polyfit degree=2
delta sign convention: driver_a - driver_b
telemetry alignment method: distance interpolation on fixed 5.0m grid
track segment comparison method: distance-bin speed comparison on fixed 10.0m grid
corner-marker source and fallback behavior: corner markers unavailable; plots degrade gracefully
thresholds or interpolation settings used: telemetry_step_m=5.0; track_step_m=10.0
